Update From The Field

February 2022

Every month, Clean Horizon's team of energy storage experts delivers an analysis of key data and trends affecting the energy storage industry worldwide. This monthly report updates and analyzes new relevant regulations, monitors commissioned and announced projects, and provides specific focus on key market trends which are likely to have a direct impact on industry stakeholders.

Table of Contents

Executive summary.....	5
1. New regulations and initiatives discussed this month	6
1.1. Americas	6
1.2. Europe.....	6
1.3. Asia	8
2. Projects updates and announcements.....	9
2.1. Overview of the 2021 and 2022 market for utility-scale energy storage projects	9
2.2. Projects announced or contracted this month.....	10
2.3. Projects commissioned this month	12
2.4. Tenders this month	14
3. Focus of the Month: Long-duration energy storage: challenges and opportunities	15
3.1. LDES is gaining traction as diversified solutions and opportunities start to emerge	16
3.1.1. A wide palette of LDES solutions.....	16
3.1.2. New opportunities are starting to emerge with California leading the way	19
3.2. Despite the growing uptake, current market configurations are not advantageous to LDES.....	21
3.2.1. Current power market structures do not make the case for LDES yet, even if some interesting changes are emerging 21	
3.2.2. Target clientele, bankability and company expertise still hinder a booming growth of LDES	24
3.2.2.1. As the storage duration goes up, customers are harder to find.....	24
3.2.2.2. The lack of references and bankability uncertainties complicate things.....	25
3.2.3. Case study: Optimal energy storage solutions and opportunities for LDES as part of the French energy transition	26
3.2.3.1. Hypotheses	26
3.2.3.2. First things first: the case of Lithium-ion battery storage	28
3.2.3.3. What about long duration energy storage ?	30
3.2.3.4. LDES versus Li-ion storage.....	32

Table of figures

Figure 1: Utility-scale energy storage projects announced/contracted and commissioned in 2021 and 2022 (ongoing)	10
Figure 2: Distribution of storage projects discharge duration by announcement date (in % of MW)	15
Figure 3: Revenues on the Belgium day ahead market assuming perfect forecast on the day-ahead market	22
Figure 4: De-rating factors for an energy storage system participating in the British capacity market	23
Figure 5: Evolution of the LCOE in a Li-ion battery-only storage power system	29
Figure 6: Evolution of the LCOE in a Li-ion battery and hydrogen storage power system	29
Figure 7: Evolution of the LCOE in a LDES-only storage power system	30
Figure 8: Evolution of the LCOE in a LDES and hydrogen storage power system	32
Figure 9: Evolution of the LCOE in a system hosting Li-ion and long duration storage solutions	33

List of tables

Table 1. Selected projects under PG&E's latest procurement	11
Table 2. Recent procurements of long-duration energy storage solutions	20
Table 3. De-rating factors for an energy storage system participating in the French capacity market	23
