# Update From The Field

---

## January 2022

Every month, Clean Horizon's team of energy storage experts delivers an analysis of key data and trends affecting the energy storage industry worldwide. This monthly report updates and analyzes new relevant regulations, monitors commissioned and announced projects, and provides specific focus on key market trends which are likely to have a direct impact on industry stakeholders.

# Table of Contents

---

<b>Executive summary</b> .....	<b>6</b>
<b>1. New regulations and initiatives discussed this month</b> .....	<b>7</b>
1.1. Americas.....	7
1.2. Europe.....	7
<b>2. Projects updates and announcements</b> .....	<b>8</b>
2.1. Overview of the 2021 and 2022 market for utility-scale energy storage projects.....	8
2.2. Projects announced or contracted this month .....	9
2.3. Projects commissioned this month.....	11
2.4. Tenders this month .....	12
<b>3. Focus of the Month: renewable plus storage around the world</b> .....	<b>16</b>
3.1. Global trends.....	16
3.2. Drivers for renewable-plus-storage worldwide.....	19
3.2.1. European market structure does not favor collocation .....	19
3.2.1.1. Generally PV plus storage projects don't fly in the European markets today.....	19
3.2.1.2. Some European countries have implemented subsidy mechanisms to foster renewable plus storage .....	23
3.2.2. In the US several drivers are identified for PV plus storage .....	24
3.2.2.1. Investment Tax Credit .....	27
3.2.2.2. Energy Storage incentives in California.....	27
3.2.2.3. The Solar Massachusetts Renewable Target (SMART) .....	28
3.2.2.4. Clean Peak Standard (CPS) in Massachusetts .....	29
3.2.3. Africa's weak grids lead to an opportunity for PV + storage .....	29
3.2.4. Australia .....	31
3.2.5. In Southern America, Chile leads PV plus storage deployments .....	33
3.3. Business case for PV plus storage in US & Chile .....	34

## Table of figures

---

Figure 1: Utility-scale energy storage projects announced/contracted and commissioned in 2021 and 2022 (ongoing)	9
Figure 2 – Overview of the share of both the stand-alone BESS and the BESS + Res projects (percentage of the capacity in MW) around the world gathering announced, under construction and operational projects	16
Figure 3 – Categorizing contractual arrangements for storage	17
Figure 4 – Evolution of energy costs and sizing of storage systems	18
Figure 5 - Illustration of the load shifting strategy	19
Figure 6 - PV + storage system 35 MW/ 70 MWh BESS dispatch on FCR and load shifting	21
Figure 7 - PV + storage system 35 MW/ 70 MWh BESS dispatch on aFRR and load shifting	22
Figure 8 - Future Innovation Tender auctions	23
Figure 9 – 2020 auction capacity awarded with the different options including PV + storage in Portugal	24
Figure 10 – Total Renewable-plus-storage capacity (excluding stand-alone storage) in North America gathering announced, under construction and operational projects	25
Figure 11 – Total Renewable-plus-storage capacity in North America gathering announced, under construction and operational projects	25
Figure 12 –Map of efforts, mandates, and targets established by states for energy storage	26
Figure 13 –Current ITC phase-out schedule for utility-scale projects	27
Figure 14 – SGIP incentives for large-scale systems	28
Figure 15 – Total Renewable-plus-storage capacity (excluding stand-alone storage) in Africa gathering announced, under construction and operational projects	30
Figure 16 – Total Renewable-plus-storage capacity in Africa gathering announced, under construction and operational projects	30
Figure 17 – Renewable-plus-storage Production profile under the South Africa PPA	31
Figure 18 – Total Renewable-plus-storage capacity (excluding stand-alone storage) in Europe gathering announced, under construction and operational projects	31
Figure 19 – Total Renewable-plus-storage capacity in Australia & Oceania gathering announced, under construction and operational projects	32
Figure 20 – Total Renewable-plus-storage capacity (excluding stand-alone storage) in Europe gathering announced, under construction and operational projects	33
Figure 21 – Total BESS-Plus-Renewable’s capacity in Southern America gathering announced, under construction and operational projects	34
Figure 22 – Assumptions for Gemini solar project in USA and Pelequen solar-plus-storage project in Chile	35
Figure 23 – Energy cost for some given projects in US and Chile	36
Figure 24 – LCOE and PPA comparison for Gemini solar project	36
Figure 25 – LCOE and PPA comparison for Pelequen solar-plus-storage project	36

# List of tables

---

Table 1 - Accessible revenues for various scenarios for PV + storage system	20
Table 2 - Portugal's Solar PV deployment agenda according to its National Energy and Climate Plan (2019)7	24
Table 3 - List of the main storage revenues stream in United States - Source: CHESS (announced, under construction and operational projects from 2018 and for those whose revenue streams are unveiled)	27
Table 4 - List of the main storage revenues stream in Australia - Source: CHESS (announced, under construction and operational projects from 2018 and for those whose revenue streams are unveiled)	32
Table 5 – Daily average spread on the wholesale market in Australia per region in the NEM market	33
