Update From The Field

March 2023

Every month, Clean Horizon's team of energy storage experts delivers an analysis of key data and trends affecting the energy storage industry worldwide. This monthly report updates and analyzes new relevant regulations, monitors commissioned and announced projects, and provides a specific focus on key market trends which are likely to have a direct impact on industry stakeholders.

Table of Contents

Executive summary	4
1. New regulations and initiatives discussed this month	5
1.1. Europe	5
1.2. North America	7
2. Project updates and announcements	8
2.1. Overview of the 2022 and 2023 markets for utility-scale energy storage projects.....	8
2.2. Projects announced or contracted this month.....	9
2.3. Projects commissioned this month	10
2.4. Tenders this month	11
3. Focus of the month: Challenges of using LFP batteries	12
3.1. The LFP battery era	12
3.2. LFP batteries: features and limitations.....	13
3.3. Best practices in the design and operation of LFP-based energy storage systems	19

Table of Figures

Figure 1: Utility-scale energy storage projects announced/contracted and commissioned in 2022 and 2023 (ongoing)	8
Figure 2: evolution of NMC vs LFP	12
Figure 3: Typical degradation curves of NMC and LFP batteries.....	13
Figure 4: Open circuit voltage curves for four Li-ion chemistries.....	14
Figure 5: Evolution of the SOC estimation error as a function of the number of cycles	15
Figure 6: illustrative 30 MW / 60 MWh Battery Energy Storage System	16
Figure 7: Difference between real and estimated SOC at 50% SOC	16
Figure 8: Difference between real and estimated SOC at 30% SOC	17
Figure 9: Situation at the end of the discharge: one subsystem stops before the others	17
Figure 10: illustrative capacity losses and operational margins from nominal capacity to useable AC capacity	19
