The Energy Storage Experts

Update from the Field – March 2018

A monthly analysis note from the energy storage experts

Table of Contents

Executive Summary	2
Table of figures	4
New regulations and initiatives discussed this month	5
Americas	5
Europe	6
Asia-Oceania	6
Projects updates and announcements	7
Overview of the 2018 market for utility-scale energy storage projects	7
Projects announced or contracted this month	8
Americas	8
Europe	8
Australia & Oceania	9
Projects commissioned this month	9
Americas	9
Europe	9
Projects tendered this month	10
Focus of the month: The market for energy storage in sub-Saharan Africa	11
Investments are taking place to increase the electrification rate and the reliability of the network, and develop renewable energy sources	11
Electrification rate, intermittent renewables penetration, and intermittent renewables target	11
Ranking of the most interesting countries for energy storage deployments in sub-Saharan Africa, based on high-level metrics	14
Business models for energy storage are diverse, and utility scale energy storage is likely to experience the strongest growth	16
On-grid utility scale energy storage coupled with renewables	17
Off-grid microgrids based on PV and storage for rural electrification	18
PV and Storage for commercial and industrial consumers	20
Development Financing Institutions (DFIs) are becoming increasingly proactive in the development of energy storage	22
DFI involvement differs depending on the project size	23
DFIs are unequally present across the continent	24
Overview of the actions undertaken by DFIs involving energy storage	26

Update from the Field – March 2018

A monthly analysis note from the energy storage experts

Table of figures

Figure 1. Utility-scale energy storage projects announced/contracted and commissioned in 2017 and 2018 (ongoing)	7
Figure 2: Current electrification rates and penetration of wind and solar in 2017 in Africa	12
Figure 3: PV+Solar deployment targets or renewables penetration targets in a selection of African countries	13
Figure 4: Scores of four representative countries of the sub-Saharan Region	15
Figure 5: Top 15 countries presenting the highest potential for energy storage deployment, based on the compilation of high level metrics.....	15
Figure 6: Utility-scale projects involving storage in Africa.....	17
Figure 7: Examples of micro-grid project involving storage in Africa.....	19
Figure 8: A shortlist of DFIs present in Africa.....	23
Figure 9: DFIs and utility type for selected African countries	25
Figure 10: DFIs fundings toward wind+PV (only considered WB, AFD, and Norfund)	26
Figure 11: DFIs having issued a tender including utility scale storage	27
