ONLINE SESSION

January 23rd, 2023/ 10 am – 11 am (CEST)

Update From The Field

January 2023

Every month, Clean Horizon's team of energy storage experts delivers an analysis of key data and trends affecting the energy storage industry worldwide. This monthly report updates and analyzes new relevant regulations, monitors commissioned and announced projects, and provides a specific focus on key market trends which are likely to have a direct impact on industry stakeholders.

Table of Contents

Table of Figures.....	4
Executive summary.....	5
1. New regulations and initiatives discussed this month	6
1.1. Europe.....	6
1.2. Asia	8
1.3. Australia.....	8
2. Project updates and announcements	9
2.1. Overview of the 2022 and 2023 markets for utility-scale energy storage projects	9
2.2. Projects announced or contracted this month.....	10
2.3. Projects commissioned this month	12
2.4. Tenders this month	13
3. Focus of the month: US & EU regulations for battery manufacturing and recycling	16
3.1. Despite extensive efforts towards local manufacturing, the US is still behind on adapted recycling rules	16
3.1.1. Investment Tax Credit for project developers.....	18
3.1.2. Advanced Energy Project Tax Credit	19
3.1.3. What about battery recycling?.....	21
3.2. The EU’s regulations for battery manufacturing and recycling are countered by a lack of support mechanisms	21
3.2.1. Focus on stationary energy storage batteries	23
3.2.1.1. Market movement	23
3.2.1.2. Carbon footprint of rechargeable batteries	23
3.2.1.3. Recycled content in batteries.....	23
3.2.1.4. Safety of stationary battery energy storage systems	25
3.2.1.5. Labelling and information requirements.....	25
3.2.1.6. Obligations for energy storage operators	25
3.3. Takeaways & market first reactions	26

Table of Figures

Figure 1. Graph presenting the storage capacity awarded during the 2027 Polish capacity auction 7

Figure 2. Utility-scale energy storage projects announced/contracted and commissioned in 2022 and 2023 (ongoing) 10

Figure 3. Inflation Reduction Act mechanisms 17

Figure 4. High-level representation of Gigafactories in the US 17

Figure 5. Before and post Inflation Reduction Act battery pack costs 20

Figure 6. High-level representation of European Gigafactories with an annual production capacity greater than 5GWh 22

Figure 7. Recycled active material rate in 2030 and 2035 24

Figure 8. Minimum recycling rate of the average weight of the battery 24
