The Energy Storage Experts

Update from the Field – May 2019

A monthly analysis note from the energy storage experts

Table of contents

Executive summary	2
New regulations and initiatives discussed this month	5
Americas	5
United States	5
Asia	5
China	5
Europe	5
Germany	5
Project updates and announcements	6
Overview of the 2019 market for utility-scale energy storage projects	6
Projects announced this month	7
Americas	7
Asia	8
Australia & Oceania	8
Projects commissioned this month	8
Europe	8
Americas	9
Tenders this month	9
Americas	9
Focus of the month: Second-life applications of electric vehicle batteries	10
Second-life battery uptake is correlated with electric vehicle adoption	10
Battery second use (B2U) set to benefit from a drastic spur by 2027 thanks to EV adoption growth	10
Despite the multitude of repurposing techniques, lack of standardization and assessment uncertainties hinder B2U growth	11
A multitude of actors is implicated in the EV B2U value chain	13
Second-life battery costs depend on the battery's state and application	15
Economic viability of second-life systems relies heavily on the repurposing technique and cycle life	15

Update from the Field – May 2019

A monthly analysis note from the energy storage experts

Table of figures

Figure 1: Utility-scale energy storage projects announced/contracted and commissioned in 2018 and 2019 (ongoing).....	6
Figure 2. Lifecycle of an EV battery.....	10
Figure 3. Estimated volumes for second-life applications (in GWh)	11
Figure 4. Typical options for second-life battery repurposing.....	12
Figure 5. Map of second-life EV battery projects and MWh by country.....	14
Figure 6. Required annual revenues for three second-life battery scenarios in comparison with a new battery and typical energy market revenues per year	16
