

CLEANHORIZON
The Energy Storage Experts

Update from the Field

October 2022

ONLINE SESSION

October 25th, 2022 / 10 am – 11 am (CEST)

CLEANHORIZON
The Energy Storage Experts

Update From The Field

October 2022

Every month, Clean Horizon's team of energy storage experts delivers an analysis of key data and trends affecting the energy storage industry worldwide. This monthly report updates and analyzes new relevant regulations, monitors commissioned and announced projects, and provides a specific focus on key market trends which are likely to have a direct impact on industry stakeholders.

Table of Contents

Table of Figures.....	4
Executive summary.....	5
1. New regulations and initiatives discussed this month	6
1.1. Europe.....	6
1.2. Asia	6
1.3. North America.....	7
1.4. South America.....	8
1.5. Australia	8
2. Project updates and announcements	10
2.1. Overview of the 2021 and 2022 markets for utility-scale energy storage projects.....	10
2.2. Projects announced or contracted this month.....	11
2.3. Projects commissioned this month	13
3. Focus of the month: New Frequency Response Services in the UK.....	17
3.1. Introduction to Great Britain	17
3.2. Frequency response services in Great Britain	18
3.2.1. Dynamic Containment	20
3.2.2. Dynamic Moderation	21
3.2.3. Dynamic Regulation	23
3.2.4. Comparison of the different frequency response services.....	24
3.3. Energy markets in Great Britain	27
3.3.1. Day-ahead Market	27
3.3.2. Balancing Market	27
3.4. Capacity Market	28
3.5. Revenue stack for two energy storage projects in Great Britain	30
3.5.1. Introduction to the energy storage projects	30
3.5.2. Revenue stack	30
3.5.3. Interaction between markets.....	33

Table of Figures

Figure 1: Procurement Mechanism.....	8
Figure 2: Utility-scale energy storage projects announced/contracted and commissioned in 2021 and 2022 (ongoing)	11
Figure 4: Share of each energy production type in the British energy grid in 2020	17
Figure 5: Ranking of route to markets based on prequalification in frequency response services in Great Britain	18
Figure 6: GB frequency response services.....	19
Figure 7: Response time for the different frequency response services.....	19
Figure 8: Rolling 3 days average of the Clearing Price and Cleared Volume for DCL	20
Figure 9: Rolling average of 3 days for Clearing price and Cleared Volume through time at DCH	21
Figure 10: Rolling average of 3 days for Clearing price and volume at DML	22
Figure 11: Rolling average of 3 days for Cleared Volume and Clearing Prices at DMH	22
Figure 12: Cleared Volume and Clearing Prices for Dynamic Regulation High	23
Figure 13: Cleared Volume and Clearing Prices for Dynamic Regulation Low.....	24
Figure 14: Energy charged or discharged daily to provide the different frequency response services.....	25
Figure 15: Portfolio average participation in frequency response services	26
Figure 16: Daily spreads and monthly average spread on the day-ahead market	27
Figure 17: Daily spreads and monthly average spread on the balancing market (source: Elexon Portal)	28
Figure 18: Volume of capacity procured in the capacity market auctions by delivery year	29
Figure 19: Evolution of derating factors for batteries in the capacity market	29
Figure 20: Revenue stack of battery	31
Figure 21: Revenue stack of battery 2.....	31
Figure 22: Monthly revenue stack for the two batteries	32
Figure 23: Percentage of participation of both selected batteries in the different frequency response services	33
Figure 24: Monthly average daily spread on the day-ahead market	33
Figure 25: Operations of battery 1 in Dynamic Containment, wholesale and balancing markets	34
Figure 26: Operation of battery 1 during days with symmetric product participation	34
Figure 27: Operations of battery 2 in day-ahead and balancing markets	35
Figure 28: Prices in day-ahead and balancing market.....	35
