Update from the Field

September 2022

ONLINE SESSION

September 20nd, 2022 / 10am – 11am (CEST)

Update From The Field

September 2022

Every month, Clean Horizon's team of energy storage experts delivers an analysis of key data and trends affecting the energy storage industry worldwide. This monthly report updates and analyzes new relevant regulations, monitors commissioned and announced projects, and provides a specific focus on key market trends which are likely to have a direct impact on industry stakeholders.

Table of Contents

Table of Figures	4
Executive summary	5
1. New regulations and initiatives discussed this month	7
1.1. Europe	7
1.2. Africa	7
1.3. North America	8
1.4. Central America	9
1.5. Asia	9
2. Project updates and announcements	10
2.1. Overview of the 2021 and 2022 markets for utility-scale energy storage projects	10
2.2. Projects announced or contracted this month	11
2.3. Projects commissioned this month	13
2.4. Tenders this month	15
3. Focus of the month: Main difficulties in energy storage development	18
3.1. BESS feasibility and design	18
3.1.1. Assessing future market opportunities	18
3.1.2. Regulation changes are unpredictable and the risk associated for storage is high	20
3.1.3. Degradation guarantee constraints must not prevent the battery to diversify applications	21
3.2. Permitting and grid connection	23
3.2.1. The repermitting process must be anticipated	23
3.2.2. Specific constraints can be imposed by insurances and local regulatory bodies	25
3.2.3. Selecting a strategic site can make a big difference on grid connection costs	26
3.3. Project finance	27
3.3.1. O&M costs can be higher than expected	27
3.3.2. AC vs DC augmentations	28
3.3.3. Warranty and performance guarantee contracts can be misleading and result in lower performance than expected	29

Table of Figures

Figure 1. Utility-scale energy storage projects announced/contracted and commissioned in 2021 and 2022 (ongoing) 11

Figure 2 - Evolution of the FCR price with regards to energy storage installed capacity (MW) between 2015 and 2020 19

Figure 3 - Example of suggested energy sizing for power ratings according to the EAR requirements 21

Figure 4 - Battery flexible operation vs constrained operation 23

Figure 5 - Typical timeline for project development 24

Figure 6 - Grid connection cost for a 10 MW connection 26
