The Energy Storage Experts

Update from the Field – October 2018

A monthly analysis note from the energy storage experts

Table of contents

Executive summary	2
Table of figures	4
New regulations and initiatives discussed this month	5
Americas	5
United States	5
Europe	5
France	5
Projects updates and announcements	6
Overview of the 2018 market for utility-scale energy storage projects	6
Projects announced or contracted this month	7
Asia	7
Europe	8
Americas	9
Projects commissioned this month	10
Americas	10
Europe	10
Projects tendered this month	11
Focus of the month: the impact of commodity prices on the cost of Li-ion batteries	12
The current trends in the Li-ion battery sector	12
The evolution of the Li-ion battery material composition	15
Composition of a Li-ion battery	15
Technical improvements of Li-ion batteries	16
Power-intensive and energy-intensive battery cell differences	18
Li-ion battery material prices	18
Evolution of material prices	18
The current raw material cost of a Li-ion battery cell	20
Estimating the raw material cost of a Li-on battery cell over the 2020 – 2025 period	21

Update from the Field – October 2018

A monthly analysis note from the energy storage experts

Table of figures

Figure 1: Utility-scale energy storage projects announced/contracted and commissioned in 2017 and 2018 (ongoing).....	7
Figure 2. List of energy storage projects on the French Islands - 2018	9
Figure 3: location of the main battery manufacturing facilities, as of 2017	13
Figure 4: location of the main battery manufacturing facilities, as of 2022 (expected)	14
Figure 5: cross section (left) and composition (right) of an LFP battery cell	15
Figure 6: cross section (left) and composition (right) of an NMC battery cell	16
Figure 7: The various configurations of NMC batteries	18
Figure 8: lithium (blue) and cobalt (red) price evolution over the 2010 - 2018 period	19
Figure 9: prices of raw materials (\$/kg) used in battery manufacturing	20
Figure 10: material cost of a NMC cell, depending on the configuration	21
Figure 11: sensitivity of the material cost of a battery cell to the variations of commodity prices	22
